

Type 1 Diabetes

BETTER SOLUTIONS. FAST.

Learning happens
where living happens.

T1D Exchange[®]

JOIN THE GLU COMMUNITY

Glu, myglu.org, is an active, diverse type 1 diabetes online community designed to accelerate research and amplify the collective voice of those living with T1D.

On Glu, you will connect with people just like you, join the conversations about living with T1D, participate in real-time research, and learn from a wealth of information within the site...*and that's just the beginning.*

On Glu I can find others just like me dealing with the challenges of diabetes management.

SUPPORT EMPOWER EDUCATE

HELP BUILD A LIVING BIOBANK

The Living Biobank enables you to contribute blood samples for use in new research initiatives that can help achieve the following:

- Understand the root cause of type 1 diabetes
- Establish new targets for drug discovery
- Identify unique characteristics of those living with type 1

I'm interested in learning more about my chronic disease, taking part in as many studies as appropriate, and sharing my experiences... thank you for your invaluable contributions.

—Biobank Member

Contact us for the opportunity to get involved and help advance research. A collection kit will be provided for your local lab and you will receive \$25 to thank you for your participation.

T1D EXCHANGE IN ACTION

ABOUT US

Our integrated model puts people at the center of a comprehensive ecosystem with four key components: A Clinic Network of 65+ clinics across the U.S., a Clinic Registry with data from 26,000+ people with T1D, a Biorepository housing a collection of clinically annotated biosamples, and Glu, the patient/caregiver online community. Together, these components accelerate the pace of research and discovery and improve patient care along the way.

T1D Exchange is a nonprofit program dedicated to improving the lives of people touched by type 1 diabetes (T1D) by facilitating better care and accelerating new therapies through a collaborative data collection and sharing network.

This program has been developed in collaboration with government agencies, JDRF, ADA, the Helmsley Charitable Trust, clinicians, industry, and people living with T1D with the overall goal of improving health outcomes.
